

UDAY PRATAP SINGH

SOFTWARE DEVELOPMENT INTERN

Email: udaypratap6145@gmail.com | GitHub: github.com/Uday-6145 | LinkedIn: linkedin.com/in/uday-pratap-singh-8a0a40375

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building complete applications across frontend, backend, and applied AI. Comfortable with React, JavaScript, Node.js, Express, MongoDB, Python, and REST APIs. I enjoy understanding how each part of a product fits together, testing what I build, and improving it through iteration. Looking for a Software Development Intern role where I can contribute to real products and grow with an engineering team.

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, JavaScript, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, Mongoose, MySQL
- **AI / Generative AI:** Python, LangChain, LangGraph, RAG, ChromaDB, LangSmith
- **Tools / languages:** Git, GitHub, VS Code, Postman, C++

PROJECTS

CourseApp | Node.js, Express.js, MongoDB

GITHUB: <https://github.com/Uday-6145/Course-selling-backend>

LIVE DEMO: <https://course-selling-backend-puce.vercel.app/>

- Completed a course-selling application with an Express and MongoDB backend for managing users, administrators, courses, and purchases.
- Designed the Mongoose data models and organized the REST API into separate routes for the platform's main areas.
- Deployed a live Vercel demo so the application can be reviewed online.

Kestrel Multi-Agent Research Assistant | Python, LangGraph, ChromaDB, Groq, LangSmith

GITHUB: https://github.com/Uday-6145/Kestrel_Research_Assistant

- Built a four-agent RAG pipeline: a router interprets the question, a retriever searches ChromaDB, a verifier checks the evidence, and a synthesizer prepares the answer.
- The verifier labels evidence as supported, partially supported, conflicting, or insufficient, and the system avoids guessing when evidence is weak.
- Evaluated 15 questions with LangSmith, reaching 80% verdict accuracy; fixed a citation-parsing bug and moved inference to Groq to improve response speed.

E-Commerce Web Application | React.js, React Router

GITHUB: <https://github.com/Uday-6145/E-commerce-website>

- Built a product catalog that loads products from a live API, with price sorting and loading feedback while requests are in progress.
- Added JWT login and protected React Router routes. Cookie-based session persistence keeps users signed in after a page refresh.
- Created a Prime Deals area that shows offers to eligible users and a clear sign-up prompt to others.

EDUCATION

NxtWave of Innovation in Advanced Technologies(NIAT) (2025-2029)

B. Tech, SoftwareEngineering | CGPA: 8.75

Kaushalya Devi Public School | Class XII (2024-2025)

Gyan Vallen Co-Ed School | Class X (2022-2023)

ACHIEVEMENTS

- 2nd place, Webathon built a webpage in a three-hour
- Finalist, OpenAI Buildathon.
- Finalist, Smart India Hackathon (SIH) internal round.
